Better care, together.

My Cancer Screening Action Plan

Cancer Screening Workshop: October 12th, 2016

1. Dr. Meghan Davis' presentation

- Smoking status documented – billing codes

- Breast screening:
  - ☐ Is the high risk program form on my EMR?
  - ☐ Do I refer to OBSP sites?
  - ☐ Do I want to use the patient decision-making tool?
  - ☐ How do I know who has had breast cancer?

- Cervical screening:
  - ☐ Where do I document those who do not need Paps anymore due to hysterectomy?
  - ☐ Do I want access to Cytobase?
  - ☐ Follow-up guidelines

- Colorectal screening:
  - ☐ Where is family history documented?
  - ☐ How is "next screening intervention" selected and set due?
    (e.g. has had a colonoscopy, no FOBT for 10 years)
  - ☐ Will someone in my office prepare FOBT kits for those overdue?
  - ☐ Who hands out the FOBT kits?
  - ☐ Do I refer +FOBT immediately to colonoscopy and not repeat the kit?
  - ☐ Who checks if there are any +FOBT/no scopes on my SAR?
  - ☐ Will my office accept +FOBT patients? (Incentive: New Patient Fee)
  - ☐ Do not do blood/urine tests for colorectal cancer

- Motivators:
  - ☐ Am I interested in doing an audit? (MainPro+ 18 credits; templates available here)
  - ☐ Do I want a facilitator to help with the audit? (*sign up on evaluation sheet*)

"**My Tool Kit**": I am interested in:

Patient Information

☐ Posters for waiting room/exam rooms

☐ Video on MyCancerIQ for waiting room

☐ Video on colorectal screening and how to do the FOBT (Long or Short)

☐ MyCancerIQ cards/posters in waiting room or on back of exam room doors

☐ Breast cancer videos in other languages (i.e. Hindi, Arabic, Bengali, Mandarin)

Office Resources

☐ Screening Guidelines

☐ Have I signed up for Physician-Linked Correspondence?

☐ Will I use Q codes to track ineligible patients?

☐ Would e-learning modules be helpful for you or your team? (e.g. SAR, EMR, screening)

Office Flow

☐ Who is our office screening champion?

☐ Do I want to use CCO cancer screening workflow sheets?

Workflow Sheet #1 Workflow Sheet #2

2. Screening Activity Report

- Report View #1: Dashboard

☐ Finding patients with +FOBT/no scope

☐ My screening rates

- Report View #2: Patient Summary

☐ Filtering for "triple reds'

- Report View #3: Specific Program Report

☐ Sorting by single screening status (Overdue? Abnormal result?)

- Report View #4: Individual Patient Report

☐ Screening data on individual patients

- Features:
  - ☐ Download to Excel and sort for recent information
  - ☐ Reconcile electronically with my EMR (if possible)
  - ☐ Limitations – Cancer Dx Delay, Hysterectomy, hospital Paps
  - ☐ How/when will I use the SAR? Do I want a delegate? (*identify on evaluation sheet*)

3. EMR

- Data Discipline and Standardization
  - ☐ Tip Sheet for PS Data Cleansing:

    PS Tips

  - ☐ Worksheets for PS:

    Worksheet #1 (PS) Worksheet #2 (PS) Worksheet #3 (PS) Worksheet #4 (PS)

  - ☐ Everyone uses consistent fields
  - ☐ Classify the test based on how you will search for it
  - ☐ How can I clean my current data?
  - ☐ How will I keep it up to date?
- Using searches for population-based cancer screening:
  - ☐ What EMR functionality is used to identify patients?
  - ☐ Who generates this list and how often?
  - ☐ How and when do clinicians review the list?
  - ☐ What method will the team use to contact patients?
- How to calculate preventative bonus:
  - ☐ Limitations
- Opportunistic screening:
  - ☐ Can I tell who is overdue when they come in?
  - ☐ How are conversations charted about screening? (e.g. decliners)
