

Are you up-to-date with colon cancer screening?

Colon cancer screening
is recommended for
men and women, ages
50-74, every 2 years

hnhbscreenforlife.ca

**Hamilton Niagara Haldimand
Brant Regional Cancer Program**

in partnership with Cancer Care Ontario

Colon cancer is a leading cause of cancer death for men in Ontario.

It doesn't have to be this way. Screening can catch signs of cancer early, when it's easier to treat. When caught early, 9 out of every 10 people with colon cancer can be cured.
